

## Audio Solutions

Audio accessories and components are essential to the performance, reliability, and seamless integration of sound systems across a wide range of applications. For decades, Tecate Group has been a trusted supplier to some of the most recognized names in the audio industry. Our engineering, production support, and warehousing operations are based in San Diego, California, ensuring responsive service and close collaboration with our customers. Manufacturing takes place at our facility in Tecate, Mexico, allowing us to maintain high quality while avoiding the costly tariffs often associated with Asian-based suppliers.

## Crossover Networks

Tecate Group specializes in the design and manufacturing of high-performance crossover networks for loudspeaker systems used in a wide variety of environments. Our expertise spans across professional and consumer audio markets, including stadiums, theatres, nightclubs, houses of worship, automotive sound systems, and residential audio setups. Our engineering team combines deep technical knowledge with advanced manufacturing capabilities to produce both passive and active crossover solutions optimized for performance, durability, and ease of integration.

## Speaker Input Plate Assemblies

Tecate Group manufactures custom and standard speaker input plate assemblies designed to meet the diverse connectivity and durability requirements of modern audio systems. These assemblies serve as critical interfaces between speaker enclosures and external amplification or signal sources, and we offer them in a wide range of configurations to suit both professional and consumer applications.

## Custom Audio Components

Tecate Group also supplies custom audio components and accessories designed to meet the precise needs of speaker manufacturers, audio engineers, and system integrators. Our product range includes high-quality inductors, capacitors, and resistors specifically selected and configured for audio crossover networks and signal path applications. Each component is available in various values, tolerances, and mounting styles to ensure optimal performance, low distortion, and long-term reliability. We work closely with customers to provide tailored solutions that meet both acoustic and electrical specifications. Whether for high-end home audio, professional sound reinforcement, or OEM production, our components deliver consistent, audiophile-grade results.

## Wiring Harnesses

Tecate Group designs and manufactures high-quality wiring harnesses tailored for a wide range of applications, including speakers, automobiles, lighting systems, and industrial equipment. Our harnesses are engineered for reliable signal transmission and power distribution, ensuring performance and safety in both standard and demanding environments. Using durable materials and industry-standard connectors, we build each assembly to meet specific mechanical, electrical, and environmental requirements.
